A/V Requirements

Computer, Projectors and Displays

Dan provides his own Apple MacBook Air 15" Thunderbolt 4 (USB-C). HDMI is also available via an included Apple USB-C Digital AV Multiport Adapter. Dan's entire presentation is presented in Apple Keynote from his computer using a 16:9 display ratio at 3840 by 2160. Client should provide a DSAN Perfect Cue system (or equivalent) for Dan's direct slide control, if not available, Dan can provide.

Microphone

Dan requires a wireless lavalier or countryman microphone connected to a professional audio system capable of room-filling vocal and musical audio.

Audio

Audio can be output from Dan's MacBook Pro via the Thunderbolt 3 / USB-C ports or a standard 3.5mm analogue headphone jack.

AV Testing / Soundcheck

Dan would prefer an A/V check no fewer than 30 minutes before taking the stage.

Confidence Monitors

Dan would love it if you have at least one confidence monitor, if possible.

No Podium

Dan prefers no podium on stage. If one must be present, please push it back so he can walk in front of it unencumbered.
